MINISTRY OF EDUCATION — GHANA EDUCATION SERVICE

WEEKLY LESSON PLANS IN THE NaCCA STANDARD FORMAT

English Language and Computing — Basic 6 — Twenty-One Lessons, 2nd to 25th June 2026

Subject	English Language and Computing
Class	Basic 6
Number of lessons	Twenty-one (English Language: 14; Computing: 7)
Period covered	Tuesday 2nd June to Thursday 25th June 2026
Duration	60 minutes per lesson; Lessons 20 and 21 are one double period (120 minutes)
Curriculum references	English Language Curriculum for Primary Schools (B1–B6), NaCCA 2019, Basic 6 section, pp. 152–235; Computing Curriculum Framework (KG1–B6), NaCCA January 2019, Strand 5, Sub-strand 1, pp. 17–18 and Strand 6, Sub-strand 7, p. 23

Notes on the format used

- Each plan follows the NaCCA weekly lesson plan layout: identification block (strand, sub-strand, content standard, indicator, performance indicator), core competencies, key words, teaching and learning materials, then Phase 1 Starter (preparing the brain for learning), Phase 2 Main (new learning including assessment) and Phase 3 Plenary/Reflection, followed by assessment, differentiation and the teacher's reflection.
- All content standards and indicators are quoted from the 2019 NaCCA curricula named above, with page references, so that every plan can be checked at source. No code has been invented.
- Part A contains the fourteen English Language lessons (2–18 June); Part B contains the seven Computing lessons (19–25 June). Lesson numbers run 1–21 continuously, matching the practicum index.

Index of the twenty-one lesson plans

No.	Date	Subject	Lesson title	Strand / Sub-strand	Content standard	Indicator(s)
1	Tue 2 Jun	English	Paragraph construction: the Galapagos Islands story	4 / 6 Paragraph Development	B6.4.6.1	B6.4.6.1.2, .1.3
2	Wed 3 Jun	English	Basics of active and passive voice (1.1)	3 / 5 Verbs	B6.3.5.1	B6.3.5.1.1
3	Thu 4 Jun	English	Listening for gist, detail and inference	1 / 7 Listening Comprehension	B6.1.7.1	B6.1.7.1.1–.1.3
4	Fri 5 Jun	English	Four steps of transformation (1.2; best lesson)	3 / 5 Verbs	B6.3.5.1	B6.3.5.1.1; B6.5.4.1.2
5	Fri 5 Jun	English	Introduction to PEEL	4 / 6 Paragraph Development	B6.4.6.1	B6.4.6.1.2, .1.3
6	Mon 8 Jun	English	Guided practice across tenses (2.1)	5 / 4 Using Action Words	B6.5.4.1	B6.5.4.1.1, .1.2, .1.4
7	Tue 9 Jun	English	5W questioning for supporting sentences	4 / 6 Paragraph Development	B6.4.6.1	B6.4.6.1.3
8	Wed 10 Jun	English	Advanced structures and reverse conversion (2.2)	5 / 4 Using Action Words	B6.5.4.1	B6.5.4.1.3, .1.4

9	Thu 11 Jun	English	“So what?” test and link sentences	5 / 8 Using Conjunctions	B6.5.8.1	B6.5.8.1.1; B6.3.8.1.1
10	Fri 12 Jun	English	Descriptive detail: sensory language	4 / 6 Paragraph Development	B6.4.6.1	B6.4.6.1.1; B6.3.4.1
11	Mon 15 Jun	English	Narrative openings: hooks and suspense	4 / 10 Narrative Writing	B6.4.10.1	B6.4.11.1.2; B6.4.9.3.1
12	Tue 16 Jun	English	Thriller story writing	4 / 11 Creative / Free Writing	B6.4.11.1	B6.4.11.1.2; B6.4.9.2.1
13	Wed 17 Jun	English	Peer review: two stars and a wish	4 / 9 Writing as a Process	B6.4.9.3	B6.4.9.3.1
14	Thu 18 Jun	English	Editing and proofreading workshop	5 / 2 Using Punctuation	B6.5.2.1	B6.5.2.1.1; B6.4.9.3.2
15	Fri 19 Jun	Computing	Meet Scratch: interface, sprites and motion	5 / 1 Algorithms and Programming	B6.5.1.1	B6.5.1.1.6
16	Mon 22 Jun	Computing	Events and loops	5 / 1	B6.5.1.1	B6.5.1.1.6
17	Mon 22 Jun	Computing	Looks and interaction	5 / 1	B6.5.1.1	B6.5.1.1.6
18	Tue 23 Jun	Computing	From algorithm to program (counting loop)	5 / 1	B6.5.1.1	B6.5.1.1.6
19	Wed 24 Jun	Computing	Finding and fixing errors (debugging)	5 / 1	B6.5.1.1	B6.5.1.1.6
20	Thu 25 Jun	Computing	Decomposition: password generator parts (double period 1)	5 / 1	B6.5.1.1	B6.5.1.1.6; B6.6.7.5
21	Thu 25 Jun	Computing	Putting it together: the password generator (double period 2)	5 / 1	B6.5.1.1	B6.5.1.1.6; B6.6.7.5

Two notes on curriculum fit

English Language — active and passive voice. The phrase does not occur in the Basic 4–6 English curriculum. The four grammar lessons (2, 4, 6 and 8) are therefore planned against B6.3.5.1 and B6.5.4.1, whose indicators require control of main and helping verbs, tense and the past participle, with voice work presented as an application of verb forms. This matches Chapter Four of the study (p. 9).

Computing — coverage. Of the six indicators in Strand 5, Sub-strand 1, only B6.5.1.1.6 concerns algorithms and programming; .1.1 to .1.5 concern databases and SQL. All seven Computing lessons sit on B6.5.1.1.6 (with B6.6.7.5 for the password generator), so the database and spreadsheet content of the sub-strand is not covered in this practicum. Scratch is named in the Basic 5 indicator B5.5.1.1.6 and is used here as the vehicle for B6.5.1.1.6.

PART A — ENGLISH LANGUAGE

Fourteen lessons, Tuesday 2nd June to Thursday 18th June 2026

LESSON 1 OF 21 — ENGLISH LANGUAGE 1 OF 14

Paragraph Construction: The Galapagos Islands Story

Week Ending	Friday, 5th June, 2026	**Day / Date**	Tuesday, 2nd June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	6. Paragraph Development
Content Standard			
B6.4.6.1 — Develop, organise and express ideas cohesively in writing and representing for a variety of purposes, audience and contexts.			
Indicator			
B6.4.6.1.2; B6.4.6.1.3			
Performance Indicator			
Learners can use a key sentence to introduce the main idea of a paragraph and support it with relevant details.			
Core Competencies			
Communication and Collaboration (CC); Critical Thinking and Problem Solving (CP); Personal Development and Leadership (PL)			
Key Words			
paragraph, topic sentence, main idea, supporting detail, unity, Galapagos Islands			
Teaching & Learning Resources			
Teacher-written passage on the Galapagos Islands; chart of a jumbled paragraph; sentence strips; class exercise books			
Reference			
English Language Curriculum for Primary Schools (B4-B6), NaCCA 2019, pp. 197-199			

Lesson Objectives

1. Identify the sentence that carries the main idea in the Galapagos Islands passage.
2. State three supporting details which explain the main idea.
3. Write a five-sentence paragraph with a topic sentence and supporting details.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Revises the difference between a sentence and a paragraph using three sentences on the board. Asks: which of these three sentences tells us what the others are about? Writes learners' answers as a working definition.	Read the three sentences. Discuss in pairs which one announces the topic. Offer definitions of a paragraph.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Reads the Galapagos passage aloud. Displays a model paragraph on a chart. Guides learners with questions to locate the main idea sentence and to say what each remaining sentence adds. Distributes jumbled sentence strips and sets the group task.	Listen to the passage. Identify the main idea sentence. Group work: rearrange the jumbled strip into a coherent paragraph and label the topic sentence and three supporting details. A group secretary presents.	Teacher-written passage on the Galapagos Islands; chart of a jumbled paragraph; sentence strips; class exercise books
PHASE 2: MAIN —	Gives each learner a topic ("Our school	Write an individual five-sentence paragraph.	Exercise books; checklist

Assessment for Learning (10 min)	garden") and asks for one paragraph written in five sentences underlining the topic sentence. Circulates and gives immediate feedback.	Underline the topic sentence. Exchange books with a partner and tick whether every sentence talks about the main idea.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Displays two scripts. Asks the class which paragraph is unified and why. Restates the rule that every sentence must serve the main idea.	Compare the two scripts. State which is unified and why. Say one thing they will check in their own next paragraph.	Chalkboard; learners' scripts
Assessment		Oral questioning (starter and plenary); group jumbled-paragraph task; individual five-sentence paragraph marked on a 4-point checklist (topic sentence present, three or more supporting details, unity, punctuation).	
Differentiation		Support: pairs receive a paragraph with the topic sentence already underlined. Challenge: able learners write a second paragraph on the same topic with a different main idea.	
Teacher's Reflection / Remarks		Learners locate the main idea readily by the end of the lesson; four groups needed prompting to keep every sentence on the topic.	
Post-lesson reflection			

LESSON 2 OF 21 — ENGLISH LANGUAGE 2 OF 14

Understanding the Basics of Active and Passive Voice (Intervention Lesson 1.1)

Week Ending	Friday, 5th June, 2026	**Day / Date**	Wednesday, 3rd June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	3. Grammar and Usage at Word and Phrase Levels	**Sub-Strand**	5. Verbs
Content Standard			
B6.3.5.1 — Apply the knowledge of verbs in communication.			
Indicator			
B6.3.5.1.1			
Performance Indicator			
Learners can identify the main verb and its helping verb in a sentence and say who or what carries out the action.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Communication and Collaboration (CC)			
Key Words			
verb, main verb, helping verb, doer, subject, active, passive, by zombies			
Teaching & Learning Resources			
Sentence strips; word cards; the “by zombies” chart; chalkboard/whiteboard			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 186-188 (see mapping note, p. 1)			

Lesson Objectives

1. Identify the doer and the action in ten given sentences.
2. Distinguish between active and passive sentences using the doer test.
3. Sort a set of sentences into active and passive columns and say why.

Lesson Delivery

Phase / Duration	Teacher’s Activities	Learners’ Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Writes four sentences on the board and asks who did the action in each. Introduces the term “doer”. Records answers without correcting.	Read the sentences. Underline the action word. Say in pairs who or what performed the action.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Explains that in an active sentence the doer is at the front, and in a passive sentence the doer is either after “by” or missing. Teaches the “by zombies” test: if the sentence still makes sense when “by zombies” is added, it is passive. Models with two examples.	Apply the “by zombies” test to ten sentence strips. Sort the strips into two columns headed ACTIVE and PASSIVE. Explain to a partner why each sentence belongs where it does.	Sentence strips; word cards; the “by zombies” chart; chalkboard/whiteboard
PHASE 2: MAIN — Assessment for	Oral questioning: presents six fresh sentences and asks learners to name the doer and the	Answer orally. Explain their reasoning in one sentence using the word “doer”.	Exercise books; checklist

Learning (10 min)	voice. Notes learners who can identify but cannot explain.		
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Summarises the two features of a passive sentence: the doer moves after “by”, or the doer disappears. Links to the next lesson.	State one difference between the two voices in their own words.	Chalkboard; learners’ scripts
Assessment		Oral questioning (recorded against a class list); sorting task with ten strips; exit ticket naming the doer in three sentences.	
Differentiation		Support: learners sort only six strips with the doer already circled. Challenge: learners rewrite two passive sentences with the doer restored.	
Teacher’s Reflection / Remarks		Identification was strong; most learners could not yet explain the structural difference, which is the focus of Lesson 4.	
Post-lesson reflection			

LESSON 3 OF 21 — ENGLISH LANGUAGE 3 OF 14

Listening for Gist, Detail and Inference

Week Ending	Friday, 5th June, 2026	**Day / Date**	Thursday, 4th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	1. Oral Language	**Sub-Strand**	7. Listening Comprehension
Content Standard			
B6.1.7.1 — Use appropriate skills and strategies to process meaning from texts.			
Indicator			
B6.1.7.1.1; B6.1.7.1.2; B6.1.7.1.3			
Performance Indicator			
Learners can listen to a level-appropriate text, state its main idea, recall details in sequence and answer inferential questions.			
Core Competencies			
Communication and Collaboration (CC); Critical Thinking and Problem Solving (CP)			
Key Words			
gist, main idea, detail, inference, sequence, visualise			
Teaching & Learning Resources			
Teacher-read passage “The Day the Rain Came”; audio of a short news item (if available); question cards; chalkboard			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 160-161			

Lesson Objectives

1. State the main idea of a text heard once.
2. Recall at least four details in the order in which they happened.
3. Answer two inference questions using evidence from the text.

Lesson Delivery

Phase / Duration	Teacher’s Activities	Learners’ Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Asks learners to close their eyes while describing a familiar scene from the school compound, then asks what they saw in their minds. Names the strategy: visualisation.	Listen with eyes closed. Describe the picture they made in their minds.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Reads the passage once at normal speed for gist. Asks one gist question only. Reads a second time for detail. Displays question cards on sequence and inference. Models one inference answer aloud, showing how the clue leads to the answer.	Listen twice. First listening: state the main idea in one sentence. Second listening: number six events in order. Answer inference questions and underline the words in the text that gave the clue.	Teacher-read passage “The Day the Rain Came”; audio of a short news item (if available); question cards; chalkboard
PHASE 2: MAIN — Assessment for Learning	Pairs learners to compare answers. Selects three learners to justify an inference aloud. Corrects with reference to the text rather than	Compare answers in pairs. Justify an inference by quoting the words that gave the clue.	Exercise books; checklist

(10 min)	by supplying answers.		
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks: what is the difference between a detail question and an inference question? Summarises the three listening targets.	Explain the difference in their own words. Name one strategy they will use next time.	Chalkboard; learners' scripts
Assessment		Gist question (oral); sequencing task of six events; two inference questions with justification. Recorded on an observation checklist.	
Differentiation		Support: slower readers receive the passage as a printed copy after the second listening. Challenge: learners write one inference question of their own for the class.	
Teacher's Reflection / Remarks		Gist was secure; inference needed modelling. Sequencing was strongest when learners numbered events on paper.	
Post-lesson reflection			

LESSON 4 OF 21 — ENGLISH LANGUAGE 4 OF 14

The Four Steps of Transformation and Tense Application (Intervention 1.2; best lesson)

Week Ending	Friday, 5th June, 2026	**Day / Date**	Friday, 5th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	3. Grammar and Usage at Word and Phrase Levels	**Sub-Strand**	5. Verbs
Content Standard			
B6.3.5.1 — Apply the knowledge of verbs in communication.			
Indicator			
B6.3.5.1.1; B6.5.4.1.2			
Performance Indicator			
Learners can apply a four-step procedure to change an active sentence to the passive, keeping the tense of the helping verb.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Communication and Collaboration (CC); Personal Development and Leadership (PL)			
Key Words			
four steps, object, subject, helping verb (to be), past participle, tense, transformation			
Teaching & Learning Resources			
Tense Transformation Table (handout, Appendix D of the study); sentence strips; chalkboard; exercise books			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 186-188, 213			

Lesson Objectives

1. State the four steps used to change an active sentence into the passive.
2. Convert simple active sentences into the passive while keeping the correct tense.
3. Use the Tense Transformation Table to select the correct form of the helping verb.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Revises Lesson 2 by asking learners to identify five sentences as active or passive using the "by zombies" test.	Apply the "by zombies" test to five sentences and name the voice.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Introduces the Four-Step Method: (1) find the object, (2) move it to the subject position, (3) add the correct form of "to be" for the tense, (4) use the past participle and add "by + doer". Presents and explains the Tense Transformation Table. Works two examples on the board, thinking aloud at each step. Circulates during pair practice, giving	Copy the four steps. Work in pairs to convert six sentences, naming the tense of the original before choosing is / was / is being / has been. Present pair answers on the board.	Tense Transformation Table (handout, Appendix D of the study); sentence strips; chalkboard; exercise books

	immediate feedback on tense selection.		
PHASE 2: MAIN — Assessment for Learning (10 min)	Independent task of five sentences. Marks on the four criteria (object as subject, correct helping verb, past participle, by + agent) with no half marks.	Convert five sentences independently. Self-check against the four steps before submitting.	Exercise books; checklist
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Selects two scripts, one correct and one with the wrong form of "to be". Asks the class to find the step where the error occurred. Clarifies common errors.	Identify the faulty step. State the pattern for simple tenses: be + past participle.	Chalkboard; learners' scripts
Assessment		Marked exercise of five items (1 mark each, awarded only when all four criteria are met); oral feedback in the plenary.	
Differentiation		Support: the table is left on display and learners convert three sentences only. Challenge: learners convert two continuous-tense sentences (is being / was being).	
Teacher's Reflection / Remarks		The table gave learners a procedure they could point to. The commonest error was using "is" with a past-tense sentence.	
Post-lesson reflection			

LESSON 5 OF 21 — ENGLISH LANGUAGE 5 OF 14

Introduction to PEEL Paragraph Structure

Week Ending	Friday, 5th June, 2026	**Day / Date**	Friday, 5th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	6. Paragraph Development
Content Standard			
B6.4.6.1 — Develop, organise and express ideas cohesively in writing and representing for a variety of purposes, audience and contexts.			
Indicator			
B6.4.6.1.2; B6.4.6.1.3			
Performance Indicator			
Learners can elaborate on a main idea by providing explanation and examples, using the PEEL structure.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Communication and Collaboration (CC)			
Key Words			
PEEL, Point, Evidence, Explanation, Link, elaboration, example			
Teaching & Learning Resources			
PEEL chart; two model paragraphs (one without evidence); highlighters; exercise books			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 197-199			

Lesson Objectives

1. Name the four parts of the PEEL paragraph and say what each part does.
2. Identify P, E, E and L in a model paragraph.
3. Write a PEEL paragraph on a familiar topic with at least one example.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Displays two paragraphs on the same topic, one with an unsupported opinion and one with evidence. Asks which is more convincing and why.	Read both paragraphs. Say in pairs which one they believe and why.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Introduces PEEL: Point, Evidence, Explanation, Link. Annotates a model paragraph on the chart with learners, highlighting each part in a different colour. Uses Think-Pair-Share on why a main idea needs elaboration, as set out in the curriculum exemplar.	Annotate a second model paragraph in pairs, colour-coding the four parts. Think-Pair-Share on the need for evidence. Share with the class.	PEEL chart; two model paragraphs (one without evidence); highlighters; exercise books
PHASE 2: MAIN —	Gives the topic "Why we should keep our	Write a PEEL paragraph. Peer-check a	Exercise books; checklist

Assessment for Learning (10 min)	classroom clean" and asks each learner to write one PEEL paragraph, then swap and tick one P, one E, one E and one L.	partner's paragraph against the four letters and write one suggestion.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks three learners to read their Link sentence. Points out that the Link returns the reader to the main idea.	Read a Link sentence aloud. State which part of PEEL they find hardest.	Chalkboard; learners' scripts
Assessment		Annotated model paragraph; individual PEEL paragraph peer-checked against a four-part checklist and then marked by the teacher.	
Differentiation		Support: sentence starters provided (My point is... For example... This shows that... Therefore...). Challenge: learners write two linked PEEL paragraphs.	
Teacher's Reflection / Remarks		The Link sentence was the weakest part; most learners simply repeated the Point.	
Post-lesson reflection			

LESSON 6 OF 21 — ENGLISH LANGUAGE 6 OF 14

Guided Practice Across Tenses (Intervention 2.1)

Week Ending	Friday, 12th June, 2026	**Day / Date**	Monday, 8th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Using Writing Conventions / Grammar Usage	**Sub-Strand**	4. Using Action Words
Content Standard			
B6.5.4.1 — Demonstrate understanding of verbs in everyday language.			
Indicator			
B6.5.4.1.1; B6.5.4.1.2; B6.5.4.1.4			
Performance Indicator			
Learners can distinguish the simple past from the present perfect and convert sentences in mixed tenses with correct helping verbs.			
Core Competencies			
Communication and Collaboration (CC); Critical Thinking and Problem Solving (CP)			
Key Words			
simple past, present perfect, has/have been, tense, detective, passage			
Teaching & Learning Resources			
"The Detective's Report" passage (Appendix E of the study); Tense Transformation Table; pair worksheets; chalkboard			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 212-214			

Lesson Objectives

1. Name the tense of a sentence before attempting a conversion.
2. Convert active sentences in the simple past and present perfect into the passive.
3. Find and list active and passive sentences in a continuous passage.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Revises the Four-Step Method. Asks learners to name the tense of four sentences written on the board before any conversion is attempted.	Name the tense of four sentences. Say which form of "to be" each will need.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Distributes "The Detective's Report". Models the first two sentences with the class. Sets pair work: find and list the active and passive sentences, then convert three of them. Requires every pair to write the tense of the original in the margin before converting. Circulates and gives feedback.	Read the passage in pairs. List active and passive sentences in two columns. Write the tense of the original in the margin, then convert three sentences. Present answers.	"The Detective's Report" passage (Appendix E of the study); Tense Transformation Table; pair worksheets; chalkboard
PHASE 2: MAIN —	Checks marginal notes for evidence that the	Complete a five-item quiz. Mark a partner's	Exercise books; checklist

Assessment for Learning (10 min)	tense was named first. Gives a short quiz of five mixed-tense items.	quiz against the answer chart.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks which tense caused the most difficulty. Consolidates the pattern for perfect tenses: have/has/had + been + past participle.	State the pattern for perfect tenses. Name the step they keep forgetting.	Chalkboard; learners' scripts
Assessment		Observation of pair work against a checklist; marginal tense notes; five-item quiz marked in pairs.	
Differentiation		Support: learners convert only simple past items. Challenge: learners convert two present-perfect items and explain the addition of "been".	
Teacher's Reflection / Remarks		High engagement with the passage. Naming the tense first visibly reduced errors.	
Post-lesson reflection			

LESSON 7 OF 21 — ENGLISH LANGUAGE 7 OF 14

The 5W Questioning System for Supporting Sentences

Week Ending	Friday, 12th June, 2026	**Day / Date**	Tuesday, 9th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	6. Paragraph Development
Content Standard			
B6.4.6.1 — Develop, organise and express ideas cohesively in writing and representing for a variety of purposes, audience and contexts.			
Indicator			
B6.4.6.1.3			
Performance Indicator			
Learners can justify the main idea of a paragraph by generating supporting details with the 5W questions.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Communication and Collaboration (CC)			
Key Words			
who, what, where, when, why, supporting sentence, detail, elaboration			
Teaching & Learning Resources			
5W question wheel or chart; the Galapagos Islands passage from Lesson 1; exercise books			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 198-199			

Lesson Objectives

1. Ask the five 5W questions about a given topic sentence.
2. Turn the answers into at least four supporting sentences.
3. Judge which supporting sentence is the strongest and say why.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Returns to the Galapagos topic sentence and asks five questions about it in rapid succession, writing the answers on the board as they come.	Answer the five questions orally. Note the answers on the board.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Introduces the 5W wheel. Models converting answers into full supporting sentences, showing how a "why" answer becomes an explanation and a "what" answer becomes an example. Sets the group task and circulates.	Group work: choose a topic sentence, ask the 5W questions, and turn the answers into four supporting sentences. Groups present one paragraph to the class.	5W question wheel or chart; the Galapagos Islands passage from Lesson 1; exercise books
PHASE 2: MAIN — Assessment for Learning	Asks each learner to write a paragraph in which two supporting sentences answer "why" and "what". Marks for relevance to	Write an individual paragraph. Underline the "why" sentence and the "what" sentence in different ways.	Exercise books; checklist

(10 min)	the topic sentence.		
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Discusses which of the five questions produces the best detail. Notes that “why” usually produces explanation and “what” produces examples.	Say which question helped them most and why.	Chalkboard; learners’ scripts
Assessment		Group paragraph presented orally; individual paragraph marked on a relevance checklist (all sentences answer the topic sentence).	
Differentiation		Support: learners use a 5W grid with prompts already written. Challenge: learners include a “so what?” sentence as well.	
Teacher’s Reflection / Remarks		The “why” question generated the richest detail. Some learners answered questions in note form and needed prompting to write full sentences.	
Post-lesson reflection			

LESSON 8 OF 21 — ENGLISH LANGUAGE 8 OF 14

Advanced Structures and Reverse Conversion (Intervention 2.2)

Week Ending	Friday, 12th June, 2026	**Day / Date**	Wednesday, 10th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Using Writing Conventions / Grammar Usage	**Sub-Strand**	4. Using Action Words
Content Standard			
B6.5.4.1 — Demonstrate understanding of verbs in everyday language.			
Indicator			
B6.5.4.1.3; B6.5.4.1.4			
Performance Indicator			
Learners can use a range of verb forms, including the past perfect, and convert passive sentences back into the active.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Personal Development and Leadership (PL)			
Key Words			
agentless passive, past perfect, had been, reverse conversion, pronoun case			
Teaching & Learning Resources			
Post-test paper (20 marks) for the separate sitting; mini-table of pronoun changes; sentence cards; chalkboard			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 213-214			

Lesson Objectives

1. Convert active sentences into agentless passives where the doer is unknown or unimportant.
2. Change passive sentences back into the active, adjusting pronoun case after “by”.
3. Use “had been” correctly in past-perfect passives.

Lesson Delivery

Phase / Duration	Teacher’s Activities	Learners’ Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Writes “Someone stole my phone” and asks how it can be said without naming the doer. Revises the pronoun table (I/me, he/him, they/them).	Offer possible rewrites. Recite the pronoun pairs from the mini-table.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Teaches agentless passives: omission of “by + someone” when the doer is unknown. Revises the perfect passive with “been”. Models reverse conversion on two sentences, thinking aloud about the pronoun change. Withdraws support gradually as pair work proceeds.	Convert four sentences in pairs: two agentless, two reverse conversions. Check the pronoun after “by” each time. Present answers.	Post-test paper (20 marks) for the separate sitting; mini-table of pronoun changes; sentence cards; chalkboard
PHASE 2: MAIN —	Administers the five-item reverse-conversion	Attempt five reverse conversions. Correct	Exercise books; checklist

Assessment for Learning (10 min)	section orally as practice, and notes recurring errors. Arranges the 20-mark post-test as a separate 45-minute sitting.	their own work against the board.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Consolidates the three patterns: agentless passive, perfect passive with “been”, and pronoun case after “by”.	Write the three patterns in their books. Name the one they still find difficult.	Chalkboard; learners’ scripts
Assessment		Post-test (20 marks) in a separate 45-minute sitting: Section A passage identification (10), Section B active-to-passive (5), Section C passive-to-active (5).	
Differentiation		Support: learners convert three sentences with the doer underlined. Challenge: learners explain why a sentence with an intransitive verb cannot be made passive.	
Teacher’s Reflection / Remarks		Agentless passives were understood in the lesson but were not always produced when the prompt did not say “do not mention the doer”. Pronoun case after “by” remained unstable.	
Post-lesson reflection			

LESSON 9 OF 21 — ENGLISH LANGUAGE 9 OF 14

The “So What?” Test and Link Sentences

Week Ending	Friday, 12th June, 2026	**Day / Date**	Thursday, 11th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Using Writing Conventions / Grammar Usage	**Sub-Strand**	8. Using Conjunctions
Content Standard			
B6.5.8.1 — Apply the knowledge of conjunctions in speech and in writing.			
Indicator			
B6.5.8.1.1; B6.3.8.1.1			
Performance Indicator			
Learners can link ideas within and across paragraphs using conjunctions that show purpose, time and condition.			
Core Competencies			
Communication and Collaboration (CC); Critical Thinking and Problem Solving (CP)			
Key Words			
link sentence, so what, therefore, however, because, so that, while, if			
Teaching & Learning Resources			
Conjunction wall chart; sample paragraphs from Lessons 1 and 5; sentence cards			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 191, 218			

Lesson Objectives

1. Explain what a link sentence does in a paragraph.
2. Choose a suitable conjunction to join two given ideas.
3. Add a link sentence to a paragraph so that it answers the question “so what?”

Lesson Delivery

Phase / Duration	Teacher’s Activities	Learners’ Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Reads a paragraph from Lesson 5 and asks “so what?” three times, showing that a paragraph without a link leaves the reader asking that question.	Answer the “so what?” questions orally. Notice where the paragraph feels unfinished.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Explains that the link sentence answers “so what?” by returning to the main idea or pointing forward. Revises conjunctions of purpose, time and condition (so that, when, while, if, because, therefore, however) using the wall chart. Models joining two ideas.	Join eight pairs of ideas with a suitable conjunction. Write one link sentence for the paragraph read in the starter and compare with a partner.	Conjunction wall chart; sample paragraphs from Lessons 1 and 5; sentence cards
PHASE 2: MAIN — Assessment for	Gives a paragraph without a link and asks learners to supply two alternative link	Write two alternative link sentences. Say which conjunction they used and why.	Exercise books; checklist

Learning (10 min)	sentences. Marks for meaning as well as grammar.		
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Displays three learners' link sentences. Asks whether each answers "so what?". Corrects misuse of "however".	Judge the three sentences. Say which conjunction they will use in their next piece of writing.	Chalkboard; learners' scripts
Assessment		Joined-ideas exercise of eight items; link sentence written independently and marked for relevance and correct conjunction.	
Differentiation		Support: learners choose from three given conjunctions. Challenge: learners write a link sentence which also introduces the next paragraph.	
Teacher's Reflection / Remarks		Most learners could add a link sentence; several used "however" where "therefore" was needed.	
Post-lesson reflection			

LESSON 10 OF 21 — ENGLISH LANGUAGE 10 OF 14

Descriptive Detail: Sensory Language and Imagery

Week Ending	Friday, 12th June, 2026	**Day / Date**	Friday, 12th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	6. Paragraph Development
Content Standard			
B6.4.6.1 — Develop, organise and express ideas cohesively in writing and representing for a variety of purposes, audience and contexts.			
Indicator			
B6.4.6.1.1; B6.3.4.1			
Performance Indicator			
Learners can identify the descriptive mode of writing and use adjectives and sensory detail to describe a scene.			
Core Competencies			
Creativity and Innovation (CI); Communication and Collaboration (CC)			
Key Words			
descriptive writing, sensory detail, sight, sound, smell, touch, taste, adjective, imagery			
Teaching & Learning Resources			
Photograph of a stormy sea; five senses chart; adjective word bank; learners' environmental surroundings			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 185, 197			

Lesson Objectives

1. Identify descriptive writing by its purpose and audience.
2. Name details drawn from at least three senses in a description.
3. Write a descriptive paragraph using adjectives and three senses.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Displays a photograph of a stormy sea and asks learners to describe it in one word each, recording the words in five columns on the board.	Offer one word each. Group the words by the sense they appeal to.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Explains the descriptive mode: purpose, audience and text features (Curriculum B6.4.6.1.1). Reads two short descriptions, one flat and one sensory. Asks learners to say which puts a picture in their minds and which words do the work.	Listen to both descriptions. Highlight the sensory words. Build a word bank of adjectives for sound and touch. Compare the two texts.	Photograph of a stormy sea; five senses chart; adjective word bank; learners' environmental surroundings
PHASE 2: MAIN — Assessment for	Asks learners to describe the school compound in five sentences using at least	Write a five-sentence description. Underline the sensory words. Read a partner's work and	Exercise books; checklist

Learning (10 min)	three senses and three precise adjectives. Circulates and prompts for detail.	name the senses used.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Reads two contrasting descriptions. Asks which senses are missing and how the writing could be sharpened.	Name the missing sense. Suggest one stronger adjective.	Chalkboard; learners' scripts
Assessment		Word-bank contribution; five-sentence descriptive paragraph marked for sensory range, adjective precision and sentence completeness.	
Differentiation		Support: learners use the five senses chart with prompts. Challenge: learners rewrite one flat sentence in three different ways.	
Teacher's Reflection / Remarks		Adjectives improved noticeably once the word bank was on display. Smell and taste were under-used.	
Post-lesson reflection			

LESSON 11 OF 21 — ENGLISH LANGUAGE 11 OF 14

Narrative Openings: Hooks and Building Suspense

Week Ending	Friday, 19th June, 2026	**Day / Date**	Monday, 15th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	10. Narrative Writing
Content Standard			
B6.4.10.1 — Narrate situations, express feelings and convey point of view about the world or a fictional world.			
Indicator			
B6.4.11.1.2; B6.4.9.3.1			
Performance Indicator			
Learners can write an opening to a story which establishes setting and character and creates suspense.			
Core Competencies			
Creativity and Innovation (CI); Critical Thinking and Problem Solving (CP)			
Key Words			
narrative, hook, opening, setting, character, suspense, short sentence, cliffhanger			
Teaching & Learning Resources			
Three model openings on cards; story-mountain diagram; exercise books			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 202-205			

Lesson Objectives

1. Name three ways of opening a story.
2. Identify the setting and main character in three model openings.
3. Write an opening of four to six sentences that creates suspense.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Reads the first line of three familiar stories and asks which makes learners want to hear more. Records why on the board.	Vote on the most engaging opening. Give a reason using the word "suspense".	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Presents three hooks: action first, dialogue first, and a short unexplained sentence. Shows the story mountain (beginning, build-up, climax, resolution). Explains how short sentences and withheld information create tension.	Identify the hook used in each model opening. Mark the setting and main character. Draft an opening of four to six sentences on a given title.	Three model openings on cards; story-mountain diagram; exercise books
PHASE 2: MAIN — Assessment for Learning	Circulates during drafting, asking two questions of each learner: where is the reader and what does the reader not yet know?	Draft an opening. Check that the reader knows where they are and has a question they want answered.	Exercise books; checklist

(10 min)			
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Reads two openings aloud and asks the class which creates more suspense and by what means.	Judge the two openings. Name one technique they will borrow.	Chalkboard; learners' scripts
Assessment		Identification of hooks and story elements in three models; drafted opening marked against three criteria (setting established, character introduced, suspense present).	
Differentiation		Support: learners choose from three given opening sentences. Challenge: learners write the same opening twice, once with dialogue and once with action.	
Teacher's Reflection / Remarks		Action openings were the most popular and the most successful. Several learners explained too much too early.	
Post-lesson reflection			

LESSON 12 OF 21 — ENGLISH LANGUAGE 12 OF 14

Thriller Story Writing

Week Ending	Friday, 19th June, 2026	**Day / Date**	Tuesday, 16th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	11. Creative / Free Writing
Content Standard			
B6.4.11.1 — Create texts.			
Indicator			
B6.4.11.1.2; B6.4.9.2.1			
Performance Indicator			
Learners can write an imaginative narrative story with a clear plot, a conflict and a resolution, using the features of a thriller.			
Core Competencies			
Creativity and Innovation (CI); Communication and Collaboration (CC); Critical Thinking and Problem Solving (CP)			
Key Words			
thriller, plot, conflict, climax, resolution, dialogue, cliffhanger, pacing			
Teaching & Learning Resources			
Story-mountain planner sheets; model thriller extract; word bank of tension vocabulary; exercise books			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 200, 204-205			

Lesson Objectives

1. Name the five elements of a narrative (characters, setting, plot, conflict, dialogue).
2. Plan a thriller using the story-mountain planner.
3. Write a thriller narrative of at least three paragraphs with a conflict and a resolution.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Reads a 60-word thriller extract and stops at the moment of danger. Asks learners what they think happens next and why they care.	Predict the next event. Say what made them want to know.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Revises the elements of narrative as listed in the curriculum exemplar (title, characters, setting, plot, conflict, dialogue). Models planning on the story mountain. Sets the writing task and reminds learners to use the sensory detail and the suspense techniques from Lessons 10 and 11. Circulates to conference with individuals.	Plan a thriller on the planner sheet: characters, setting, conflict, climax, resolution. Write the story in at least three paragraphs. Use at least two short sentences for tension and one line of dialogue.	Story-mountain planner sheets; model thriller extract; word bank of tension vocabulary; exercise books
PHASE 2: MAIN —	Confers with individuals at the planning stage	Complete the plan and the first draft. Self-	Exercise books; checklist

Assessment for Learning (10 min)	before writing begins. Collects drafts at the end for marking against a five-point narrative checklist.	check against the five elements and tick each one present.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks three learners to read their climax aloud. Identifies the moment of greatest tension and asks how it was built.	Read the climax aloud. Name the technique used to build tension.	Chalkboard; learners' scripts
Assessment		Story-mountain plan; first draft marked on a five-point narrative checklist (elements present, conflict, climax, resolution, cohesion) plus a comment on tension.	
Differentiation		Support: learners use a partially completed planner and a three-part frame. Challenge: learners write the story from the point of view of the pursuer.	
Teacher's Reflection / Remarks		Planning on the story mountain improved structure markedly. Several drafts lacked a resolution within the time available.	
Post-lesson reflection			

LESSON 13 OF 21 — ENGLISH LANGUAGE 13 OF 14

Peer Review and Revision Using “Two Stars and a Wish”

Week Ending	Friday, 19th June, 2026	**Day / Date**	Wednesday, 17th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	4. Writing	**Sub-Strand**	9. Writing as a Process
Content Standard			
B6.4.9.3 — Apply strategies for improving drafts for publishing.			
Indicator			
B6.4.9.3.1			
Performance Indicator			
Learners can review and revise a draft, proposing improvements in grammar and vocabulary, using “two stars and a wish”.			
Core Competencies			
Communication and Collaboration (CC); Personal Development and Leadership (PL); Critical Thinking and Problem Solving (CP)			
Key Words			
peer review, two stars and a wish, revise, draft, feedback, improvement			
Teaching & Learning Resources			
Two stars and a wish prompt cards; thriller drafts from Lesson 12; peer review grid; red and green pens			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 201-202			

Lesson Objectives

1. Give two specific compliments and one improvement suggestion on a peer’s draft.
2. Revise their own draft in response to feedback.
3. Explain how a revision has improved the writing.

Lesson Delivery

Phase / Duration	Teacher’s Activities	Learners’ Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Marks a short paragraph on the board with two stars and a wish, modelling the language of specific feedback (“I like how...”, “I wonder whether...”).	Identify what makes feedback useful rather than general.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Explains the peer review protocol: read the draft twice, one for meaning and one for detail. Distributes the review grid. Insists on evidence: each star must name a sentence. Monitors pairs to keep comments specific.	Exchange drafts. Read twice. Write two stars and one wish on the review grid, naming sentences. Return drafts and discuss orally with the author.	Two stars and a wish prompt cards; thriller drafts from Lesson 12; peer review grid; red and green pens
PHASE 2: MAIN — Assessment for Learning (10 min)	Requires every learner to make at least two changes to their own draft in red pen. Checks that the wish has been acted upon rather than merely noted.	Revise the draft in red pen, making at least two changes in response to the wish. Explain one change to their partner.	Exercise books; checklist

PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks three learners to show a before-and-after sentence and explain the improvement.	Show a before-and-after sentence. Explain what changed and why it is better.	Chalkboard; learners' scripts
Assessment		Completed peer review grid (specific and evidence-based); revised draft with at least two visible changes; oral explanation of one change.	
Differentiation		Support: reviewers use sentence stems for all three comments. Challenge: learners review two drafts and compare the types of feedback they gave.	
Teacher's Reflection / Remarks		Feedback became markedly more specific once the sentence stems were introduced. A few pairs gave praise only and needed prompting for the wish.	
Post-lesson reflection			

LESSON 14 OF 21 — ENGLISH LANGUAGE 14 OF 14

Editing and Proofreading Workshop

Week Ending	Friday, 19th June, 2026	**Day / Date**	Thursday, 18th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Using Writing Conventions / Grammar Usage	**Sub-Strand**	2. Using Punctuation
Content Standard			
B6.5.2.1 — Show understanding of how punctuation is used appropriately in writing.			
Indicator			
B6.5.2.1.1; B6.4.9.3.2			
Performance Indicator			
Learners can edit and proofread a draft, correcting punctuation, capitalisation, spelling and usage.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Personal Development and Leadership (PL)			
Key Words			
edit, proofread, comma, quotation marks, apostrophe, capitalisation, spelling			
Teaching & Learning Resources			
Unpunctuated passage on a chart; proofreading checklist; learners' revised drafts; coloured pens			
Reference			
English Language Curriculum B4-B6, NaCCA 2019, pp. 201-203, 210			

Lesson Objectives

1. Correct commas, quotation marks and apostrophes in a given passage.
2. Proofread a draft against a four-point checklist.
3. Produce a clean final copy for publication.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Displays an unpunctuated passage and asks the class to punctuate it together, focusing on quotation marks for direct speech and the apostrophe for plural possession (Curriculum B6.5.2.1.1).	Punctuate the passage on the board. Justify each mark added.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Explains the four-point proofreading checklist: capitalisation, punctuation, spelling, usage. Demonstrates on a sample script from the previous lesson. Reminds learners of the errors listed on the common-error sheet and of the passive constructions covered earlier.	Proofread their own revised thriller draft twice: once for capitalisation and spelling, once for punctuation and usage. Mark corrections in the margin. Produce a clean final copy.	Unpunctuated passage on a chart; proofreading checklist; learners' revised drafts; coloured pens

PHASE 2: MAIN — Assessment for Learning (10 min)	Collects the clean copies and checks them against the four-point checklist. Notes the three most frequent errors for whole-class feedback.	Self-check the clean copy against the checklist. Read one paragraph aloud to a partner to hear errors.	Exercise books; checklist
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Names the three most frequent errors and displays a corrected example of each. Sets the publication task: fair copies to be displayed on the class notice board.	Correct the three displayed errors. State which error they made most often.	Chalkboard; learners' scripts
Assessment		Punctuation exercise on the unpunctuated passage; proofreading checklist applied to own draft; clean final copy marked for conventions.	
Differentiation		Support: learners proofread a shorter extract with the errors limited to two types. Challenge: learners proofread an anonymised peer script and list the errors by type.	
Teacher's Reflection / Remarks		Spelling and quotation marks were the commonest problems. Reading aloud to a partner helped learners hear missing punctuation.	
Post-lesson reflection			

PART B — COMPUTING

Seven lessons, Friday 19th June to Thursday 25th June 2026

LESSON 15 OF 21 — COMPUTING 1 OF 7

Meet Scratch: Interface, Sprites and Motion

Week Ending	Friday, 19th June, 2026	**Day / Date**	Friday, 19th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6 (with B5.5.1.1.6 as the prerequisite: identify programming applications and their use, e.g. vb.net, java, scratch)			
Performance Indicator			
Learners can identify the main parts of the Scratch interface and move a sprite using motion blocks.			
Core Competencies			
Digital Literacy (DL); Critical Thinking and Problem Solving (CP); Communication and Collaboration (CC)			
Key Words			
program, Scratch, interface, stage, sprite, block palette, script area, motion block, code			
Teaching & Learning Resources			
Computers or tablets with Scratch installed (offline editor preferred); projector or printed chart of the Scratch interface; "robot teacher" command cards; sprite cards			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17; see also p. 17 for the B5 prerequisite			

Lesson Objectives

1. Name the stage, sprite, block palette and script area on the Scratch interface.
2. Open Scratch, choose a sprite and add a backdrop.
3. Build a short script of three motion blocks that moves the sprite across the stage.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Plays the "robot teacher" game: the teacher obeys only exact commands such as "move three steps forward", and does nothing when told "walk a bit". Asks learners why the robot failed and draws out the need for exact, ordered instructions.	Give commands to the teacher. Notice which commands worked and explain why vague ones failed.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Launches Scratch and names the four parts of the interface with learners: stage, sprite, block palette, script area. Demonstrates dragging three motion blocks into the script	Open Scratch. Point to and name the stage, sprite, block palette and script area on their own screen. Add one sprite and one backdrop. Build a script of three motion	Computers or tablets with Scratch installed (offline editor preferred); projector or printed chart of the Scratch interface; "robot teacher" command cards; sprite cards

	area and clicking the green flag. Explains that a script is a set of instructions carried out in order, which is what an algorithm is. Circulates to support learners who cannot find blocks.	blocks and run it with the green flag.	
PHASE 2: MAIN — Assessment for Learning (10 min)	Asks each learner to show a running script and to name one block they used and say what it does. Uses an observation checklist of four interface parts and one working script.	Run their script for the teacher. Name a block and explain what it does. Help a partner who is stuck.	Exercise books; checklist
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Displays two scripts, one that moves the sprite and one that does nothing. Asks the class to find the difference and states that order matters in a program.	Explain why one script worked and the other did not. Say one part of the interface they can now name.	Chalkboard; learners' scripts
Assessment		Observation checklist (four interface parts named; sprite and backdrop added; a three-block script that runs); oral questioning in the plenary.	
Differentiation		Support: learners use a printed picture of the interface and complete a labelling task before touching the computer. Challenge: learners add a fourth block that changes the sprite's direction.	
Teacher's Reflection / Remarks		Most learners found the block palette quickly; the commonest difficulty was dragging blocks without releasing them over the script area.	
Post-lesson reflection			

LESSON 16 OF 21 — COMPUTING 2 OF 7

Events and Loops

Week Ending	Friday, 26th June, 2026	**Day / Date**	Monday, 22nd June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6			
Performance Indicator			
Learners can start a script with an event block and use a repeat block to make a set of instructions run more than once.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Digital Literacy (DL); Creativity and Innovation (CI)			
Key Words			
event, green flag, when key pressed, loop, repeat, repeat forever, sequence, instruction			
Teaching & Learning Resources			
Computers with Scratch; two printed scripts (one with a repeat block, one without); loop demonstration chart; command cards			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17			

Lesson Objectives

1. Explain what an event block does in a script.
2. Use “when green flag clicked” and “when key pressed” to start a script.
3. Use a repeat block to run a set of instructions ten times instead of copying it ten times.

Lesson Delivery

Phase / Duration	Teacher’s Activities	Learners’ Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Asks ten learners in turn to clap once. Then asks one learner to clap ten times using a single instruction (“clap ten times”). Draws out that one instruction can stand for many actions — the idea of a loop.	Clap as instructed. Say which way was shorter and why.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Displays two scripts side by side: one with ten copied motion blocks and one with a single repeat block. Explains the event block (green flag, key press) as the instruction that starts a script. Demonstrates the repeat block, then sets the pair task and circulates.	Build a script that starts with “when green flag clicked” and moves the sprite five times inside a repeat block. Change the number in the repeat block and predict the result before running. Then add a second script started by a key press.	Computers with Scratch; two printed scripts (one with a repeat block, one without); loop demonstration chart; command cards
PHASE 2: MAIN —	Gives a prediction task: what will happen if	Write a prediction. Run the script and	Exercise books; checklist

Assessment for Learning (10 min)	the repeat number is changed to 20? Checks prediction against the run. Notes learners who copy blocks instead of using a loop.	compare with the prediction. Explain the difference if any.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks three learners to explain why the loop version is better than copying blocks. Summarises: an event starts a script, a loop repeats it.	State the difference between an event block and a loop block in their own words.	Chalkboard; learners' scripts
Assessment		Prediction task; observation of the two scripts (event-started and loop-driven) running correctly; oral questioning.	
Differentiation		Support: learners are given the script on a card to copy exactly. Challenge: learners use "repeat forever" with a conditional to stop it, or nest a loop.	
Teacher's Reflection / Remarks		Learners accepted the loop quickly once they had compared the two printed scripts; several still clicked the sprite rather than the green flag to start a script.	
Post-lesson reflection			

LESSON 17 OF 21 — COMPUTING 3 OF 7

Looks and Interaction

Week Ending	Friday, 26th June, 2026	**Day / Date**	Monday, 22nd June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6			
Performance Indicator			
Learners can use looks and sensing blocks to make a sprite change its appearance and respond to what the user types.			
Core Competencies			
Creativity and Innovation (CI); Digital Literacy (DL); Communication and Collaboration (CC)			
Key Words			
looks block, costume, size, say, sensing, ask and wait, answer, input, interaction			
Teaching & Learning Resources			
Computers with Scratch; printed block cards for looks and sensing; a short dialogue script on a chart; two pre-made sprite costumes			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17			

Lesson Objectives

1. Use looks blocks to change a sprite's costume, size and speech.
2. Use "ask and wait" to collect an answer from the user.
3. Join the user's answer to a say block so the sprite replies to the user.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Demonstrates a two-sprite conversation already built in Scratch and asks learners which blocks make the sprite speak and which make it listen. Writes the guesses on the board.	Watch the demonstration. Suggest which blocks are responsible for speaking and for listening.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Introduces the looks category (costume, size, say) and the sensing category (ask and wait, answer). Models a script in which the sprite asks the user's name and replies. Points out that "answer" holds whatever the user typed. Sets the task.	Make the sprite change costume and size. Build a script using "ask and wait" and a say block joined to "answer", so the sprite replies to them by name. Test with a partner.	Computers with Scratch; printed block cards for looks and sensing; a short dialogue script on a chart; two pre-made sprite costumes
PHASE 2: MAIN —	Moves around the room asking learners to	Test their script with an empty answer and	Exercise books; checklist

Assessment for Learning (10 min)	show a working interaction. Asks: what happens if the user types nothing? Requires learners to test the empty answer.	with a partner's name. Note what the sprite says in each case.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks two learners to demonstrate their interactive sprite. Discusses why the reply must be joined with "answer" rather than typed as fixed text.	Demonstrate their sprite. Explain the role of the "answer" block.	Chalkboard; learners' scripts
Assessment		Observation of a working interactive script; short written explanation of what "answer" does; oral questioning.	
Differentiation		Support: learners complete a partly built script with two blocks missing. Challenge: learners add a second question and make the sprite give two different replies.	
Teacher's Reflection / Remarks		The "answer" block caused confusion at first; learners who tested an empty answer understood it fastest.	
Post-lesson reflection			

LESSON 18 OF 21 — COMPUTING 4 OF 7

From Algorithm to Program: The Counting Loop

Week Ending	Friday, 26th June, 2026	**Day / Date**	Tuesday, 23rd June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6			
Performance Indicator			
Learners can write an algorithm for a simple operation and convert it into a working program that adds numbers using a loop.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Digital Literacy (DL); Creativity and Innovation (CI)			
Key Words			
algorithm, step, pseudocode, variable, total, initialise, loop, counting, sum, output			
Teaching & Learning Resources			
Algorithm worksheet; computers with Scratch; chart showing the ten addition steps; variable and operator block cards			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17			

Lesson Objectives

1. Write an algorithm in numbered steps for adding ten numbers.
2. Create a variable, set it to zero and change it inside a loop.
3. Run the program and check that the output is correct.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Asks the class to add 1 + 2 + 3 + 4 + 5 aloud, step by step, writing each running total on the board. Asks whether there is a shorter way to say "keep adding until ten". Relates this to the loop from Lesson 16.	Add the numbers aloud and call out each running total. Suggest how the repeated addition could be written once.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Models the algorithm first, on paper, as numbered steps (Curriculum B6.5.1.1.6: write algorithms for simple operations). Then converts each step into a Scratch instruction: make a variable "total", set it to 0, repeat 10 times, change total by the counter, then say total. Thinks aloud at each conversion.	Write the algorithm in numbered steps on the worksheet. Build the program in Scratch: variable "total" set to 0, repeat 10, change by 1 each time plus the running total, say the result. Run it and check against paper working.	Algorithm worksheet; computers with Scratch; chart showing the ten addition steps; variable and operator block cards

PHASE 2: MAIN — Assessment for Learning (10 min)	Checks the output against the expected value and asks learners to explain what happens if the variable is not set to zero first. Notes which learners can trace their program step by step.	Compare the program's output with the answer worked on paper. Test what happens when the variable is not set to zero, and explain the result.	Exercise books; checklist
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Displays a correct and an incorrect program side by side. Asks the class to trace each one step by step and identify where the incorrect one goes wrong.	Trace both programs aloud. Identify the faulty step in the incorrect one.	Chalkboard; learners' scripts
Assessment		Written algorithm in numbered steps (marked for order and completeness); working program producing the correct total; oral tracing of the program.	
Differentiation		Support: learners are given the algorithm with two steps missing and complete it before programming. Challenge: learners change the loop so that only even numbers are added.	
Teacher's Reflection / Remarks		Writing the algorithm on paper first made the programming markedly easier. Forgetting to set the variable to zero was the commonest error.	
Post-lesson reflection			

LESSON 19 OF 21 — COMPUTING 5 OF 7

Finding and Fixing Errors (Debugging)

Week Ending	Friday, 26th June, 2026	**Day / Date**	Wednesday, 24th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6			
Performance Indicator			
Learners can find and correct errors in a program and explain what was wrong.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Digital Literacy (DL); Personal Development and Leadership (PL)			
Key Words			
error, bug, debugging, trace, prediction, order of blocks, initialise, test			
Teaching & Learning Resources			
Five prepared "broken" Scratch projects or printed scripts with errors; debugging log sheet; computers with Scratch			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17			

Lesson Objectives

1. Identify at least three kinds of error in a Scratch program.
2. Correct errors so that a broken script runs as intended.
3. Explain in writing what was wrong and how it was fixed.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Shows a script that should make a sprite count to ten but does nothing when the green flag is clicked. Asks learners to suggest one reason. Introduces the word "debugging".	Suggest reasons why the script does not work. Offer one change to test.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Presents the three commonest error types seen in the class: blocks in the wrong order, a variable used before it is set, and a loop with the wrong number in it. Distributes the broken projects. Models debugging one project aloud, changing one thing at a time and re-running after each change.	Open the broken projects one at a time. Read the script, predict what it will do, run it, then change one block and re-run. Record each error and fix on the debugging log.	Five prepared "broken" Scratch projects or printed scripts with errors; debugging log sheet; computers with Scratch
PHASE 2: MAIN —	Reviews the debugging logs. Asks learners to	Complete the debugging log (what I	Exercise books; checklist

Assessment for Learning (10 min)	demonstrate one fix and to say how they knew what was wrong. Checks that changes were made one at a time rather than all at once.	expected, what happened, what I changed). Demonstrate one fix to the class.	
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Asks: which is faster, changing everything at once or changing one thing at a time? Draws out that testing one change at a time shows which change worked.	Explain why one change at a time is a better method. Name the error type they found hardest.	Chalkboard; learners' scripts
Assessment		Debugging log for five projects (three corrected as a minimum); demonstration of one fix; written explanation of one error.	
Differentiation		Support: learners debug two projects with only one error each. Challenge: learners write a broken script of their own for a partner to fix.	
Teacher's Reflection / Remarks		Learners tended to change several blocks at once, then could not say which change had worked. The log slowed them down usefully.	
Post-lesson reflection			

LESSON 20 OF 21 — COMPUTING 6 OF 7

Decomposition: Parts of a Password Generator (Double Period, Part 1)

Week Ending	Friday, 26th June, 2026	**Day / Date**	Thursday, 25th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes (part 1 of a double period; 120 minutes in total with Lesson 21)
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6; B6.6.7.5 (security of personal passwords)			
Performance Indicator			
Learners can break a task into smaller parts and write an algorithm for each part.			
Core Competencies			
Critical Thinking and Problem Solving (CP); Digital Literacy (DL); Creativity and Innovation (CI)			
Key Words			
decomposition, sub-task, password, character set, pick random, join, variable, length, security			
Teaching & Learning Resources			
Large chart of a whole task; four task cards; computers with Scratch; character-set cards (letters, digits, symbols)			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17; Strand 6, Sub-strand 7, p. 23 for B6.6.7.5			

Lesson Objectives

1. List the smaller parts that make up a password generator.
2. Write an algorithm for one part: choosing random characters from a set.
3. Build a script that joins random characters into a short string.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Asks how a pupil would make up a password of six characters. Writes the class's answer as a single long instruction, then breaks it into parts on the board. Names the strategy: decomposition. Links to why passwords must not be easy to guess (Curriculum B6.6.7.5).	Suggest how to make up a password. Help break the long instruction into smaller steps.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Displays the four sub-tasks on task cards: (1) choose the character set, (2) pick a random character, (3) join characters together, (4) repeat until the password is long enough.	In groups, take one sub-task and write its algorithm in steps. Then build the matching script in Scratch and test it on its own. Groups present their part and how it fits the	Large chart of a whole task; four task cards; computers with Scratch; character-set cards (letters, digits, symbols)

	Groups take one card each and write the algorithm for it. Models the “pick random” and “join” blocks.	whole.	
PHASE 2: MAIN — Assessment for Learning (10 min)	Checks each group’s script works on its own before it is allowed into the final program. Asks each group to state, in one sentence, what their part does.	Test their part on its own. State in one sentence what their part does. Note what the whole group still needs from the other parts.	Exercise books; checklist
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Puts the four parts on the board in order and asks the class whether the order matters. Confirms that the parts will be joined in the next lesson.	Arrange the four parts in order and explain the ordering.	Chalkboard; learners’ scripts
Assessment		Group algorithm for one sub-task (marked for order and completeness); working script for that sub-task; one-sentence description of the part.	
Differentiation		Support: groups are given the algorithm with the blocks named. Challenge: groups add a fifth part that guarantees at least one digit in the password.	
Teacher’s Reflection / Remarks		Decomposition worked well as a group task; groups needed reminding that each part must be tested before it is joined to the others.	
Post-lesson reflection			

LESSON 21 OF 21 — COMPUTING 7 OF 7

Putting It Together: The Password Generator (Double Period, Part 2)

Week Ending	Friday, 26th June, 2026	**Day / Date**	Thursday, 25th June, 2026
Class	Basic 6 (Class size: _____)	**Duration**	60 minutes (part 2 of a double period; 120 minutes in total with Lesson 20)
Strand	5. Programming and Databases	**Sub-Strand**	1. Introduction to Databases, Algorithms and Programming
Content Standard			
B6.5.1.1 — Show a basic understanding and use of Databases, Algorithms and Programming.			
Indicator			
B6.5.1.1.6; B6.6.7.5			
Performance Indicator			
Learners can combine the parts of a task into one working program, test it and explain how it meets the purpose.			
Core Competencies			
Digital Literacy (DL); Critical Thinking and Problem Solving (CP); Communication and Collaboration (CC); Personal Development and Leadership (PL)			
Key Words			
combine, integrate, password generator, length, random, test, evaluate, strong password			
Teaching & Learning Resources			
Group scripts from Lesson 20; computers with Scratch; test record sheet; a wall chart on choosing strong passwords			
Reference			
Computing Curriculum Framework (KG1–Basic 6), NaCCA / Ministry of Education, January 2019, Strand 5, Sub-strand 1, p. 17; Strand 6, Sub-strand 7, p. 23 for B6.6.7.5			

Lesson Objectives

1. Combine the group scripts into one working password generator.
2. Test the program with at least three different password lengths.
3. Explain why a longer password is harder to guess.

Lesson Delivery

Phase / Duration	Teacher's Activities	Learners' Activities	Resources
PHASE 1: STARTER (Preparing the brain for learning) (10 min)	Recalls the four parts from Lesson 20 and asks the class to state what each part does. Sets the challenge: one program that produces a password of any length the user asks for.	State what each of the four parts does. Predict what the combined program will do.	Chalkboard; sentence strips
PHASE 2: MAIN — New Learning (30 min)	Shows how to combine the parts by copying scripts into one project and using a variable for the length. Supports groups as they integrate. Requires every group to test three	Combine the parts into one project. Add a question asking the user for the password length and use the answer in the loop. Test with lengths 4, 8 and 12. Record the outputs	Group scripts from Lesson 20; computers with Scratch; test record sheet; a wall chart on choosing strong passwords

	lengths before calling the program finished. Leads the discussion linking length and randomness to password strength (B6.6.7.5).	on the test sheet. Present the working program to the class.	
PHASE 2: MAIN — Assessment for Learning (10 min)	Uses the test sheets as the assessment record: three lengths tested, three different outputs produced. Asks each group one question about why their password is hard to guess.	Complete the test record with the three outputs. Answer the question about strength. Suggest one improvement to the program.	Exercise books; checklist
PHASE 3: PLENARY / REFLECTION (Learner and teacher) (10 min)	Two groups demonstrate their generators. Summarises the sequence of the seven lessons: instructions, events, loops, looks, algorithms, debugging, and now a finished program built in parts.	Demonstrate the generator. Explain one improvement they would make next. Reflect on what they can now build alone.	Chalkboard; learners' scripts
Assessment		Working combined program; completed test record for three lengths; oral explanation of password strength; group presentation.	
Differentiation		Support: groups integrate three of the four parts with the fourth supplied. Challenge: groups make the generator guarantee one digit and one symbol, and explain why that rule helps.	
Teacher's Reflection / Remarks		Integration exposed the debugging skills from Lesson 19; groups that tested each part separately in Lesson 20 integrated fastest.	
Post-lesson reflection
